3. The following is an examiner's statement of reasons for allowance: Applicants have developed a hybrid maize line, designated 39R34, seed of which has been deposited with the ATCC under Accession No. PTA-5465. 39R34 was produced by crossing maize inbred lines GE533276 and GE533139, which have been deposited with the ATCC under Accession Nos. PTA-5518 and PTA-4283, respectively. The deposits meet the conditions of 37 CFR 1.801-1.809, as indicated in the deposit statements on page 40 of the specification and in the paper submitted by Applicant on January 19, 2004, page 11, and in the paper submitted by Applicant on July 10, 2003, page 8, last paragraph. Numerous morphological and physiological characteristics of 39R34 are taught in Table 1 of the specification. The prior art does not teach any maize lines that have the combination of traits shown in Table 1. Regarding claims 2 and 66: when the claimed part of the maize plant is a seed, it is interpreted to mean that the seed is that which produces the claimed plant. Any comments considered necessary by Applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should

preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
